

MOM'S CHOICE AWARDS® CONTENT CLASSIFICATION STANDARDS

Mom's Choice Awards®

Honoring excellence in family-friendly media, products, and services.

A) About Content Classification

The Mom's Choice Awards® works to help families grow emotionally, physically and spiritually. Our judges are especially interested in entries that are morally sound and promote good will; are inspirational and uplifting.

Still, we realize there are many important works that deal with disturbing themes or contain what some may see as "objectionable" content. We believe content should be evaluated using educational criteria, and that content must be viewed in the context of the work as a whole.

Banning content with difficult themes and language, or even "the insinuation thereof," would deprive exposure to vast amounts of important material, including Shakespeare and major religious texts such as the Bible.

Content classification is managed by the Executive Committee of the Mom's Choice Awards®. Classification decisions are to give effect, as far as possible, to the following principles:

Minors should be protected from material likely to harm or disturb them, everyone should be protected from exposure to unsolicited material they find offensive, the need to take account of community concerns such as depictions that condone or incite violence and portrayal of persons in a demeaning manner.

The Executive Committee works to classify materials in an "age appropriate" manner – meaning the point at which children have sufficient life experience and cognitive skills to comprehend certain material.

For the purposes of the awards program, the following classification standards have been established. If you are not sure your book, product or service complies with these standards, please don't hesitate to contact us for clarification.
